

Chemical Free Clothing for Tick Bite Prevention – Rynoskin

There are many different kinds of clothing available to help in tick bite prevention. One of those is chemical free – Rynoskin, which is ultralight and worn underneath regular clothing. Rynoskin prevents **ticks, mosquitoes, chiggers, black flies, ants, no-see-ums, and other biting insects** from entering through its clothing to reach the skin to feed/bite.

Clothing items include: Shirts, pants, hoods, gloves and socks

According to Rynoskin:

- **98.9% bite proof clothing Chemical Free.**
- **Aids in preventing Zika, Lyme Disease, Rocky Mountain Spotted Fever and other vector borne illnesses.**
- **Impenetrable Fabric, Breathable, Lightweight Comfortable fitting elastic cuffs provide maximum protection.**
- **Designed to be worn underneath the clothing.**
- **Scientifically/Field tested.**
