

LDA Memorializes Advocate with Education Grant

The Lyme Disease Association Board of Directors has set up an educational grant in honor of the late Dr. Lis Heininger, who was long time Chapter Chair of the Corning/Fingerlakes Area Lyme Disease Association Chapter. The grant will be awarded annually to an individual advocate or an organization that has little to no funds to operate and may face adverse personal conditions yet continues to work for the Lyme cause. This year, LDA has awarded the first *Dr. Lis Heininger Memorial Education Grant* to the Lyme Disease United Coalition in Iowa, whose president, Judy Weeg, has overcome tremendous obstacles yet has continued her work with the Coalition.

The idea behind the grant is to memorialize everything Dr. Heininger had done for Lyme disease in spite of the considerable obstacles thrown in her path from Lyme. Her dedication, passion, and strength are traits which helped her to educate so many people about tick-borne diseases. She impacted thousands of people with her outreach efforts and broke many barriers in the region which were impeding educational efforts.

Dr. Heininger, one of many people originally misdiagnosed with MS, was dedicated to education to prevent this tragedy from happening to others. Correctly diagnosed with chronic Lyme a decade ago, she hosted many community awareness programs, including a local Lyme disease awareness walk. She educated local Boy Scout troops, made presentations to the public, in schools and on TV. She played an important role as a chronic Lyme advocate in all levels of government and took time to meet with legislators, bringing her story, the latest research findings and her incredible determination to the forefront in an attempt to make a difference for future generations

LDA & SLAM – Awareness Partners

Working with S.L.A.M., Sturbridge Lyme Awareness of Massachusetts, the Lyme Disease Association (LDA) provided a grant to S.L.A.M. to have the printing done for a MA billboard. According to S.L.A.M. Founder Trish McCleary, who was responsible for getting its donation through LAMAR advertising, "This is the second year for a billboard for S.L.A.M. The billboard is located Rt. 20A opposite Rt. 291 Southbound in Springfield MA." S.L.A.M. is also spearheading 'Ribbons Across America' for the month of May which is an awareness campaign started by S.L.A.M. in 2009. 'Ribbons' includes lime green ribbons on area Town Commons, homes and businesses and serves to raise awareness of the tick-borne diseases and remember those who have lost their battle with TBD's.

This Massachusetts billboard joins the LDA's own Spring awareness campaign which includes the digital CBS billboard in Times Square, NY, running throughout May, June and a portion of July; several radio interviews; a TV spot; and other media interviews.

Education Advocacy for Children with Lyme

2010 Annual Conference – March 11th to 14th St. Louis, Missouri

The Council of Parent Attorneys and Advocates(COPAA)

Judith Leventhal, PhD, Patricia Exman, Education Advocate and Sandy Berenbaum, LCSW, BCD will be presenting “Complex Multi-System Medical Illness: Educational Needs and Advocacy Strategies.” Using Lyme disease as the model, the presentation will provide information about the complexity of symptoms and resulting cognitive and functional impairments that can interfere with a child’s ability to learn and attend school regularly.

This presentation will provide participants with valuable information about the challenge children with tick-borne diseases face when

navigating their learning environment and the accommodations and services to which they are entitled. There will be an emphasis on the need for a deep understanding of Lyme disease and other tick borne illnesses to effectively advocate for the educational needs of students with tick borne illnesses. With Lyme disease as a model this presentation will serve as a guide to support the educational needs of children with other complex multi-system medical illnesses.

This is an exciting opportunity to have an impact on the lives of students with Lyme disease around the country, through developing a network of advocates and attorneys who understand the devastating impact of this disease. The inclusion of our presentation and associated materials in the Conference Compendium will provide this important information to all Conference attendees. **We hope that medical and mental health professionals and advocates around the country will encourage education advocates and attorneys in their communities to attend this conference.**

We gratefully acknowledge an Education Grant from the Lyme Disease Association supporting our presentation. In addition, Time for Lyme and the Lyme Disease Association are co-sponsoring an exhibit table at the Conference.

Please refer to the COPAA website, www.copaa.org <<http://www.copaa.org/>> for conference details. Please feel free to re-post this announcement.
