

Tick IPM Academy

The IPM Institute of North America, in collaboration with the Midwest Center of Excellence for Vector-Borne Disease and TickEncounter, is thrilled to announce the first annual Tick IPM Academy November 6 -7 in Madison, Wisconsin!

Who should attend?

- pest management and landscape care professionals, facility/institutional/public grounds managers
- educators, Extension, public health, government, school and state regulatory professionals

Participants will learn:

1. Key concepts in tick biology, disease diagnosis and treatment
2. Hands-on, practical strategies and tactics to reduce tick populations and public health impacts
3. Current knowledge gaps, innovative research efforts and anticipated near-term advances
