U.S. POSTAGE
PAID
PERMIT No. 1
NEW BRUNSWICK, NJ

CONFERENCE FACULTY . . .

Brian A. Fallon, MD, MPH Lyme Disease or Hypochondriasis
Professor of Psychiatry, Columbia University College of Physicians & Surgeons

RW Stich, MS, PhD Persistence of Tick-Borne Infections
Associate Professor, Veterinary Pathology, University of Missouri

Chaconas, George, PhD Live Imaging Studies of Dissemination of the Lyme Spirochete in Mice
Canada Research Chair, Molecular Biology of Lyme Borreliosis, Department of Biochemistry & Molecular Biology, University of Calgary, Canada

Kenneth Liegner, MD Problems of Lyme Disease Testing
Private Practice Internal & Critical Care Medicine Lyme Borreliosis & Related Disorders, NY

John N. Aucott, MD Erythema Migrans (EM) in Lyme Diagnosis
Assistant Professor of Medicine, Johns Hopkins University School of Medicine

Nicole Baumgarth, DVM, PhD B Cell Subversion During Borrelia Infection - A Persistence Strategy
Professor of Pathology, Microbiology, Immunology University of California, Davis

Ellen Stromdahl, MS US Army Findings in Ticks from the Upper Midwest
Entomologist, US Army Public Health Command Entomological Sciences Program, Aberdeen Proving Grounds, MD

Edward Breitschwerdt, DVM Bartonellosis: A One Health Approach to a Persistent Blood Borne Infection
Professor of Medicine & Infectious Diseases, Center for Comparative Medicine & Translational Research, College of Veterinary Medicine, NCSU

Madeleine Cunningham, PhD Anti-Neuronal Antibodies in Lyme Disease
Professor of Microbiology & Immunology; Director, Immunologic Training Program, Health Sciences Center, University of Oklahoma

Richard Rhee, MD Lyme Disease: Neurologic Differential
Clinical Professor, Robert Wood Johnson Faculty; Private Practice, Board Certified, Neurology NJ

Earnest Visconti, MD Helpful Hints in the Differential Diagnosis of Lyme Disease
Attending in Medicine & Pediatrics, Lutheran Medical Center, Brooklyn; Pediatric ID, Staten Island Hospital & Richmond University Medical Center, NY

Sam T. Donta, MD Issues in the Treatment of Lyme Disease
Private practice, specializes in infectious diseases, MA

Leila Zackrison, MD Lyme Disease: Rheumatologic/Autoimmune Differential
Private Practice, internal medicine, rheumatology; Fairfax, VA

Judith Miklossy, MD, PhD, DSc Neuropathophysiology of Late/ Chronic Lyme Disease and its Relation with Alzheimer's Disease
President, Prevention Alzheimer International Foundation; Director, International Alzheimer Research Center, Switzerland

A.T. Charlie Johnson, PhD Detecting Lyme Disease Using Antibody-Functionalized Single-Walled Carbon Nanotube Transistors
Prof. & Graduate Chair, Assoc. Chair for Graduate Affairs; Secondary appts: Materials Science & Engineering, Electrical & Systems Engineering, UPENN

Sam Shor, MD Chronic Fatigue & Lyme Disease, Is There a Connection?
Associate Clinical Professor, George Washington University Health Care Sciences; Chair, Loudoun County Lyme Commission; Private Practice, VA

Elizabeth Maloney, MD The Ethics of Clinical Decision-Making When the Scientific Evidence is Unclear or Absent Pres., Partnership for Health & Healing (accredited CME program provider) MN
